Our brand model

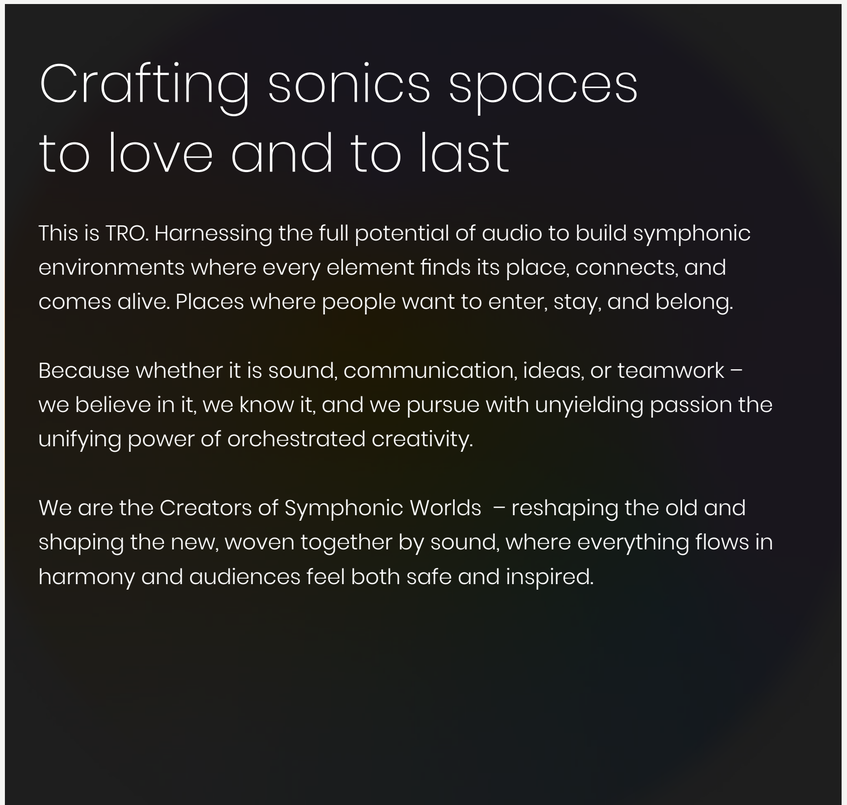

1

Our brand model
Brand idea

Creators of Symphonic Worlds

Status Quo: The world comes apart.
Our world is a mess. A shattered cacophony of images, messages, and noise. A crescendo of content, growing by the day. Too much to handle. Too much to enjoy. Too much to feel at home—leaving us restless and disoriented. Brands want to give people belonging, but too often they only add to the chaos with more fragments, more noise, more confusion.

The Insight: The longing to feel at home.
In a time splintered by the crossfire of generic content, we can offer a remedy. By creating sound for brands —masterfully tuned and aligned with their identity —we bring the pieces into a coherent whole. A sonic world that offers refuge: stable ground for audiences, a place to join, enjoy, and feel at home.

Background and rational :
Real creators of real symphonic worlds that matter.

Creators
Passionate Human creativity and engaged conscious collaboration are at the heart of our work. They give our sound its originality and force – turning it into a sensual energy that shapes immersive spaces.

Symphonic
Everything we do follows a deliberate intention: to bring rich diversity into one coherent artistic expression. Distinct elements – ideas, styles, and emotions – orchestrated into perfect harmony of higher order.

Worlds
Through skillful and imaginative composition, we create rich sound-scapes with distinctive atmosphere and identity – worlds of sound that listeners can feel, enter, and remember.

1

Our brand model
Brand values

The unique character traits: Our core believe and guiding principles

Transcend
(creative excellence + advanced advisory)

We believe in the power of ambition and bold imagination.
By pushing the boundaries of creative artistry and intelligent strategy, we bring inspiration and orientation – turning vision into tangible results and delivering work that goes beyond expectation.

Resonate
(real human focus + cultural force)

We believe in the power of real people and shared meaning.
By empowering genuine talent and relationships, and by drawing on cultural insight, we create signification and orientation – building connections that move hearts, minds, and brands alike.

Orchestrate
(holistic approach + product & service depth)

We believe in the power of many and their productive interplay.
Whether ideas, talents, teams, or technologies —we know what is relevant, master interaction, and deliver amplification and simplification through perfectly aligned results.

1

Our brand model

Brand purpose

Creating highly immersive and empathically designed sound experiences for people, companies, and brands —giving them orientation, simplification, and a deep sense of belonging.

Creating innovative and emotionally powerful sound design – driven by ambitious human creativity and intelligent strategic thinking.

New meaning and harmony to a chaotic world through sound.

Creating sound experiences that bring inspiration and signification – giving people and brands new energy, emotional depth, and a renewed sense of meaning.

Creating sound that amplifies what truly matters in an age of overload —transforming cultural noise into clarity, emotion, and focus.

1

Our brand model
Brand positioning

The Business Model: How we create and deliver unique value in a way only we can.

Who	TRO is a Germany-based international agency for strategic sound design
What	offering highly effective and holistic audio experiences that connect brands and audiences on a deeper emotional level
Why	through the advanced mastering and seamless collaboration of people, ambitious creative talent, strategic expertise, and state of the art technology
Whom	for companies and brands that seek to enrich and empower their identity and communication through sophisticated sound design.

“...creative skill to create new harmonic sound spaces.”
“...a new standard of perfectly integrated sound spaces.”
“... a new kind of sound design that re-connects the world.”
“... advanced unified sound that build sonic spaces.”
“...creative sound to turn complexity into harmony.”

2

Logo

2

Logo
Standard

The TRO logo is the central element of the visual identity. It consists of a filled circle and the word-mark, housed inside a rounded rectangle.

The shape references a toggle switch – a simple, universally understood symbol for turning something on. But it goes further than that. In its extended form, the logo becomes a play bar or navigation tool, with the circle moving from left to right. This reflects what TRO does at its core – creating sonic spaces that come alive, that move and that invite people in.

A brand mark that does not just identify, but activates. The logo is available in two versions – light on dark and dark on light – to ensure flexibility across all applications.

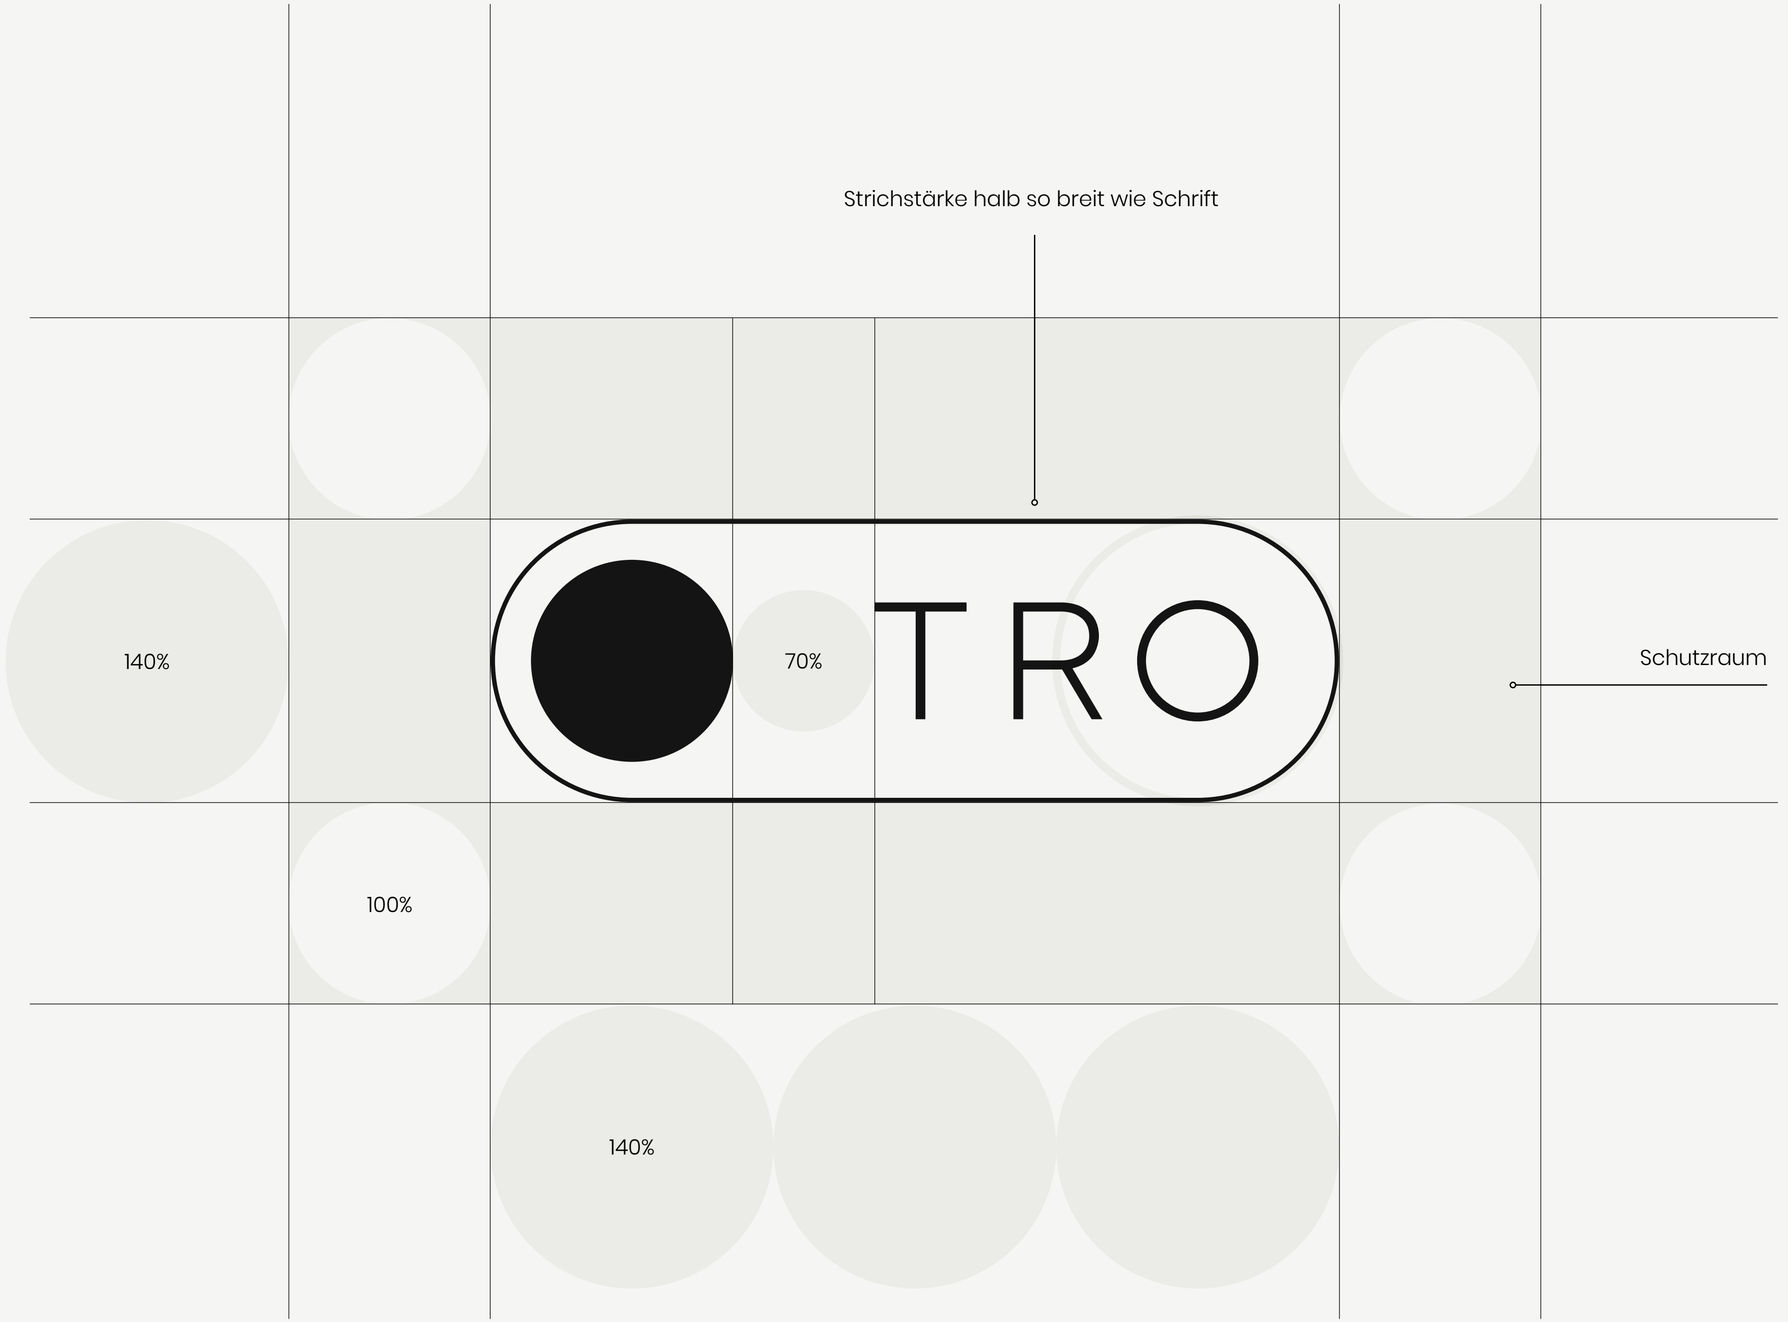

2

Logo
Construction

The logo is built on a clear construction grid.
The stroke weight is exactly half the width of the letterforms. A defined clear space surrounds the logo on all sides and must always be maintained. This ensures the logo remains legible and visually consistent at every size.

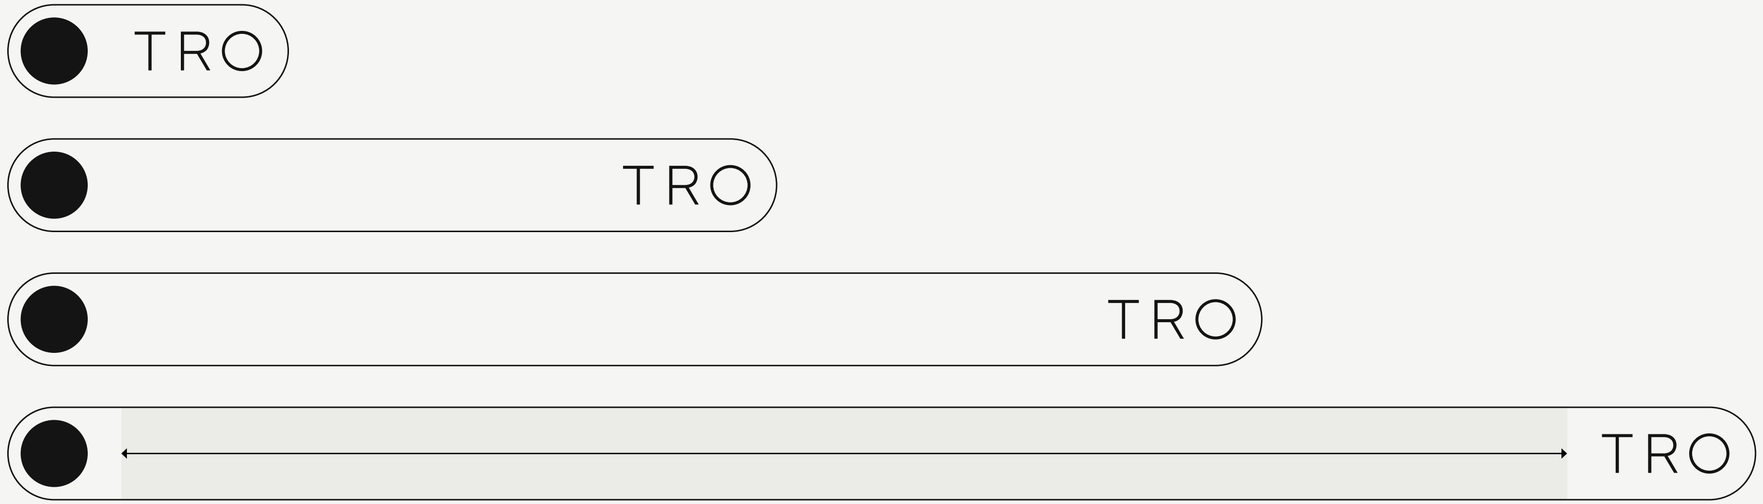

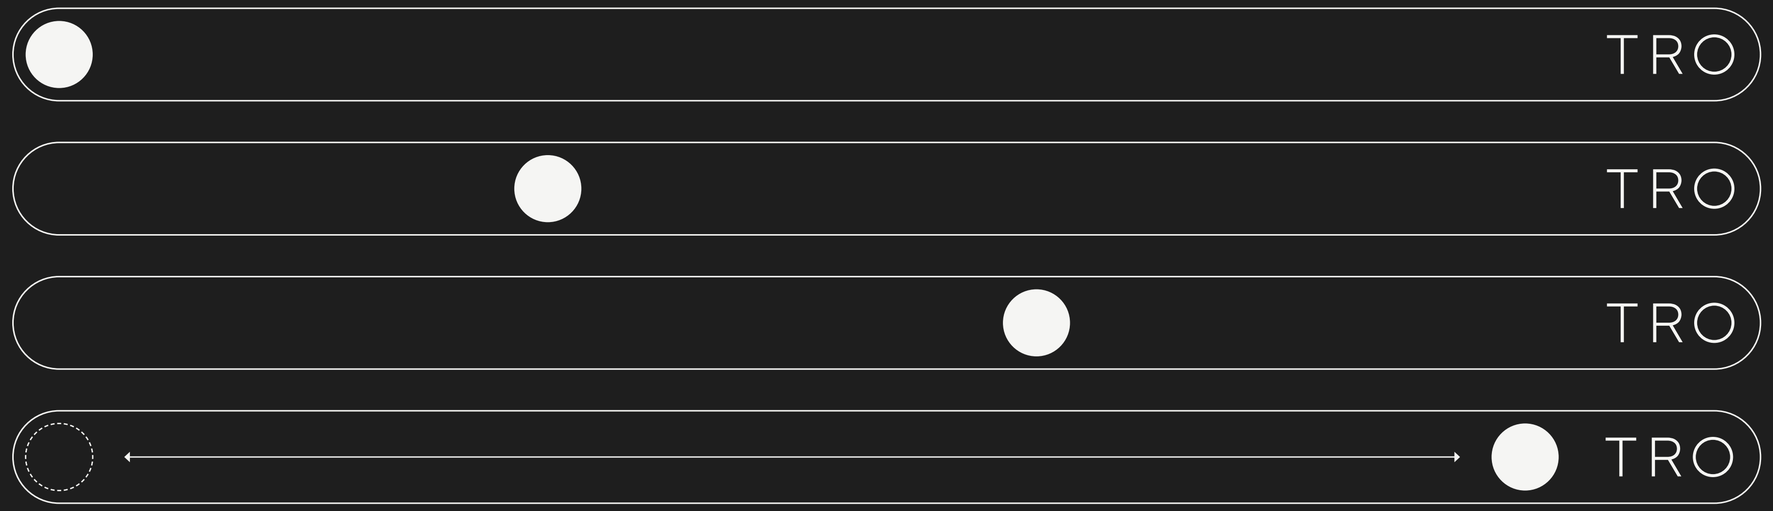

2

Logo
Flexibility

Beyond its static form, the logo is designed to move. The width of the bar can extend to fill any format. When animated, the circle travels from left to right along the bar – functioning as a play button or a progress indicator.

This makes the logo not just a brand mark, but an interactive element that lives naturally in digital and audio contexts. Both the flexible width and the moving circle follow fixed rules to ensure a consistent appearance.

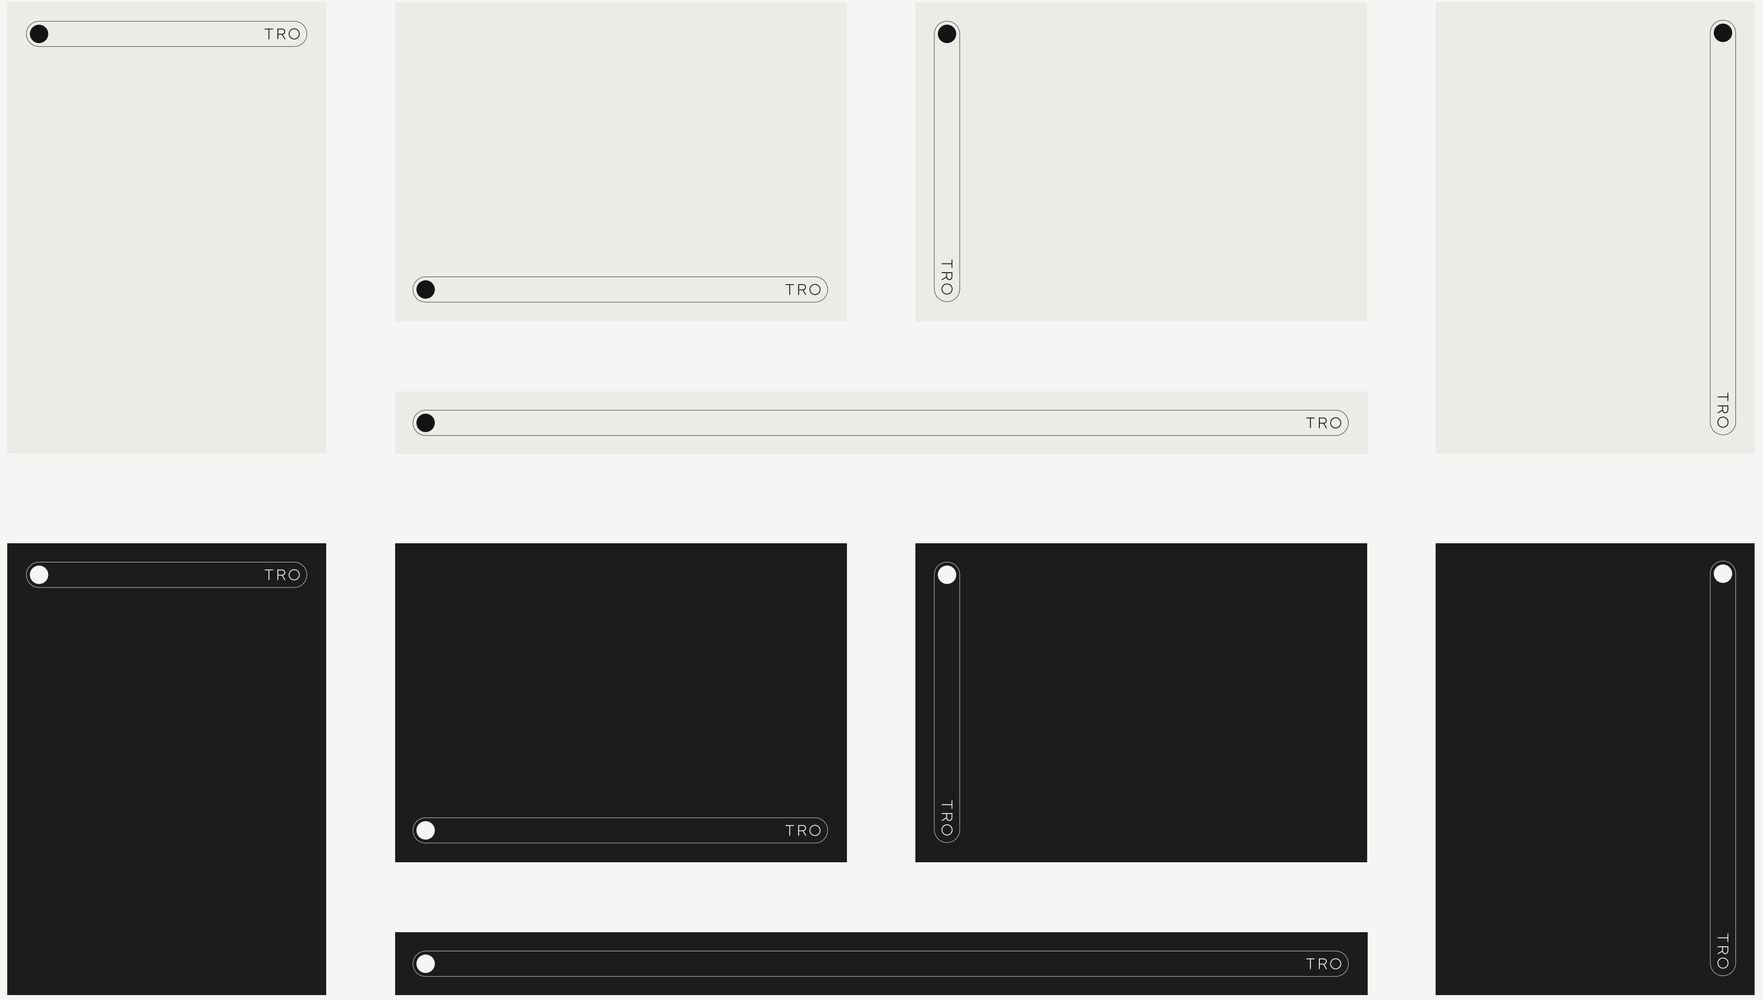

2

Logo
Position

The logo can be placed in different positions within a layout – horizontal or vertical, at the top or bottom of a format. When used in its extended form, it can span the full width of a page or screen, reinforcing its character as a navigation or progress bar.

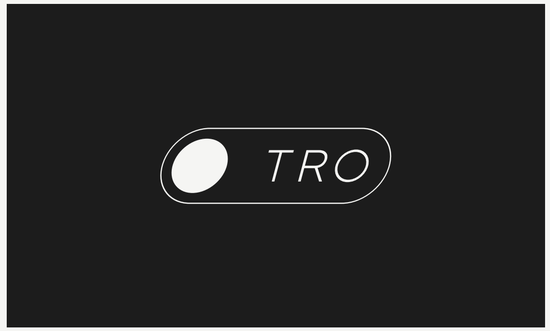

It is available for use on both light and dark backgrounds. All placement variations shown here are approved for use.

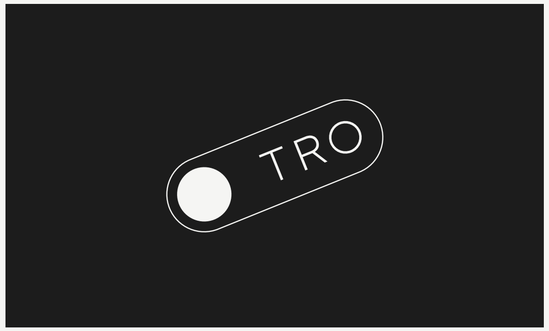

2

Logo
Don’ts

To protect the integrity of the logo, certain uses are not permitted. The logo must not be distorted, freely rotated, or recolored. It must not be placed on busy backgrounds, used with low contrast or made transparent. The typeface and spacing must not be altered. Any deviation weakens the clarity and recognition of the mark.

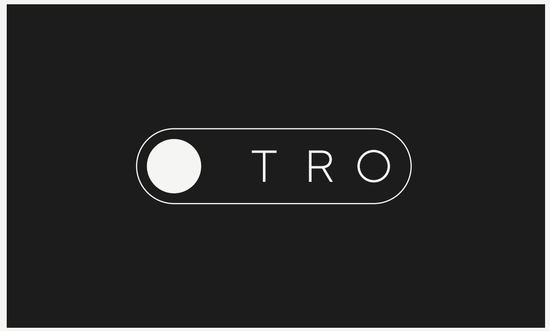

Do not distort.

Do not rotate other than 90º.

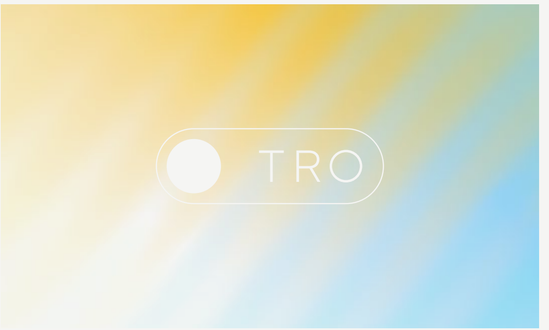

Do not change colors.

Do not change spacing.

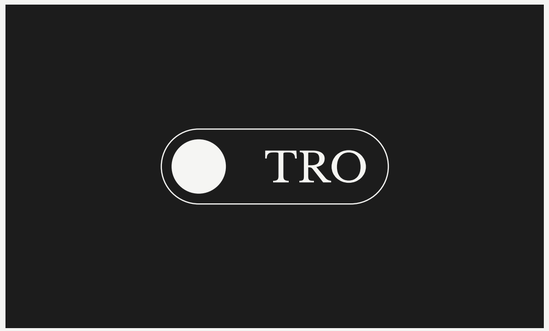

Do not place on busy backgrounds.

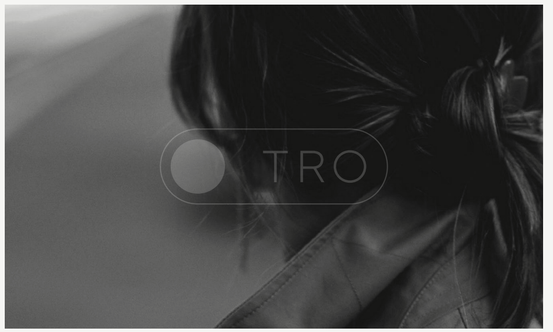

Do not use low contrast.

Do not use an outline circle.

Do not replace the typeface.

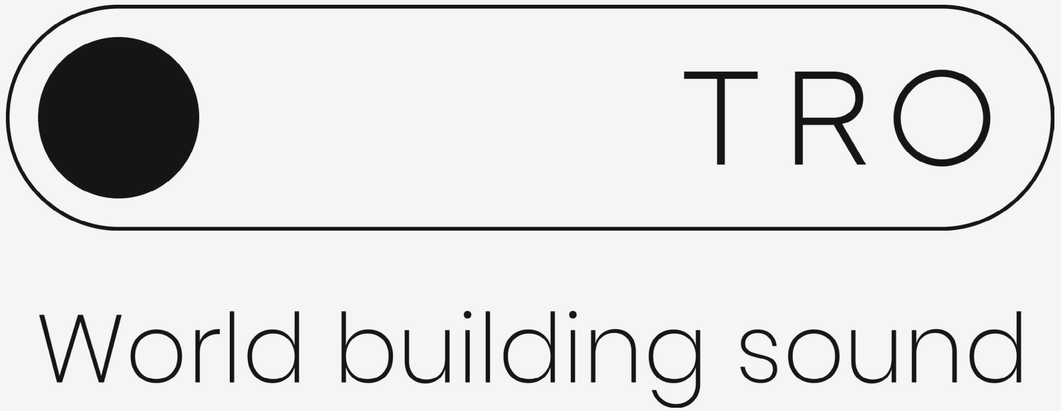

Do not apply transparency.

2

Logo
Claim

The claim **“World building sound”** is an optional addition to the logo. It is placed below the logo mark and used as a fixed combination.

In three words, it captures the strategic heart of TRO – the belief that sound is not a backdrop, but a space. A place where people want to enter, stay and belong. The claim and logo together form a complete unit and should not be separated or rearranged.

3

Colors

3

Colors
Primary

The TRO color palette is built on two primary colors. TRO Off-White and TRO Charcoal form the foundation of the visual identity – a neutral, high-contrast base that keeps the brand clear and flexible across all applications.

TRO Yellow is the signature accent color. It adds energy and warmth and serves as the most recognizable color of the brand. All three colors are defined across RGB, Hex and CMYK for consistent use in both digital and print.

TRO CHARCOAL	
RGB	30 30 30
Hex	#1E1E1E
CMYK	75 | 65 | 60 | 80
PANTONE	TBD

TRO OFF-WHITE	
RGB	245 245 243
Hex	#F5F5F3
CMYK	5 | 3 | 5 | 0
PANTONE	TBD

TRO YELLOW	
RGB	255 200 50
Hex	#FFC832
CMYK	0 | 25 | 85 | 0
PANTONE	TBD

3

Colors
Secondary

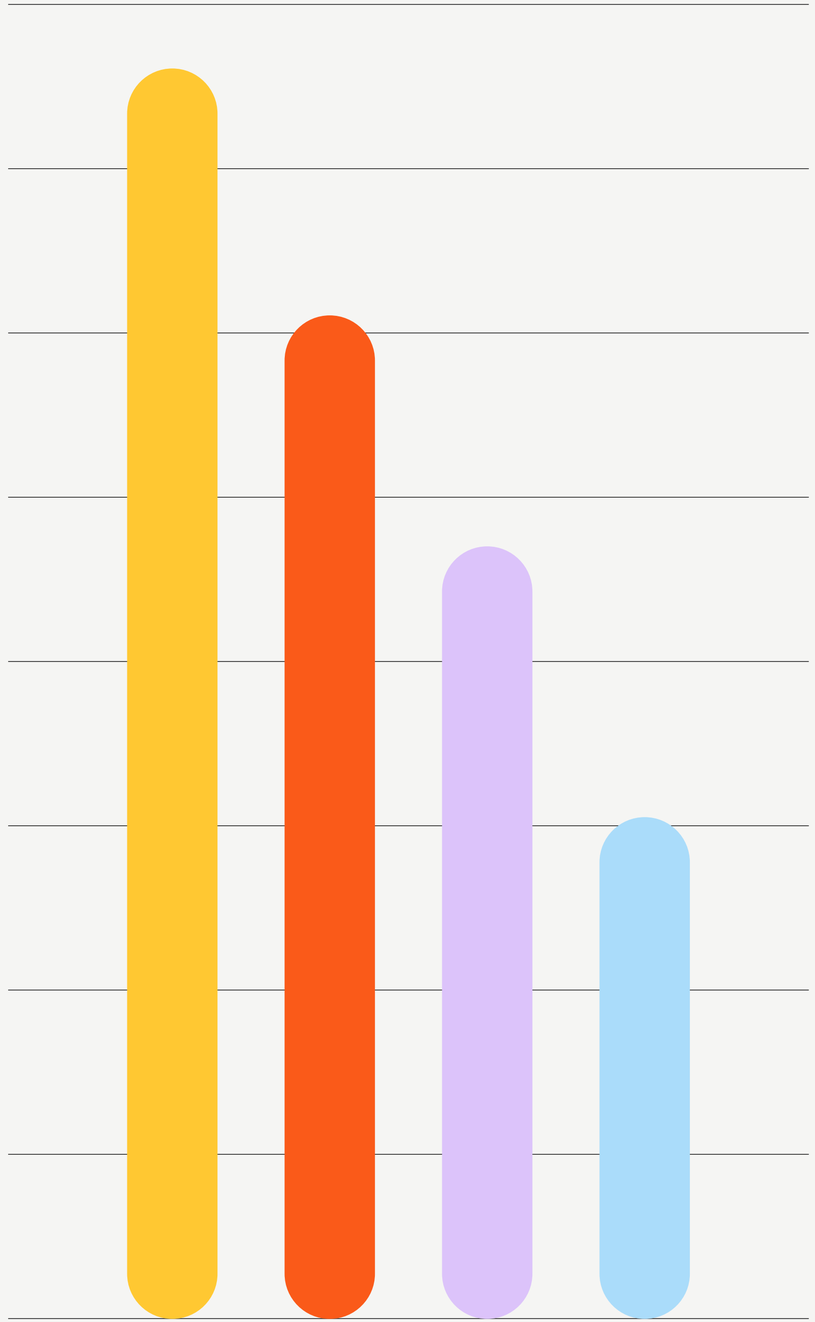

The secondary palette extends the brand with three additional colors – TRO Red, TRO Lavender and TRO Light Blue.

These colors are used to support the primary palette in campaigns, interfaces, and other brand applications. They add variety and flexibility without compromising the overall visual identity. Like the primary colors, each is defined across all color systems for consistent reproduction.

TRO RED	
RGB	250 90 25
Hex	#FA5A19
CMYK	0 | 75 | 90 | 0
PANTONE	TBD

TRO LAVENDER	
RGB	220 195 250
Hex	#DCC3FA
CMYK	18 | 27 | 0 | 0
PANTONE	TBD

TRO LIGHT BLUE	
RGB	170 220 250
Hex	#A0DCFF
CMYK	36 | 0 | 0 | 0
PANTONE	TBD

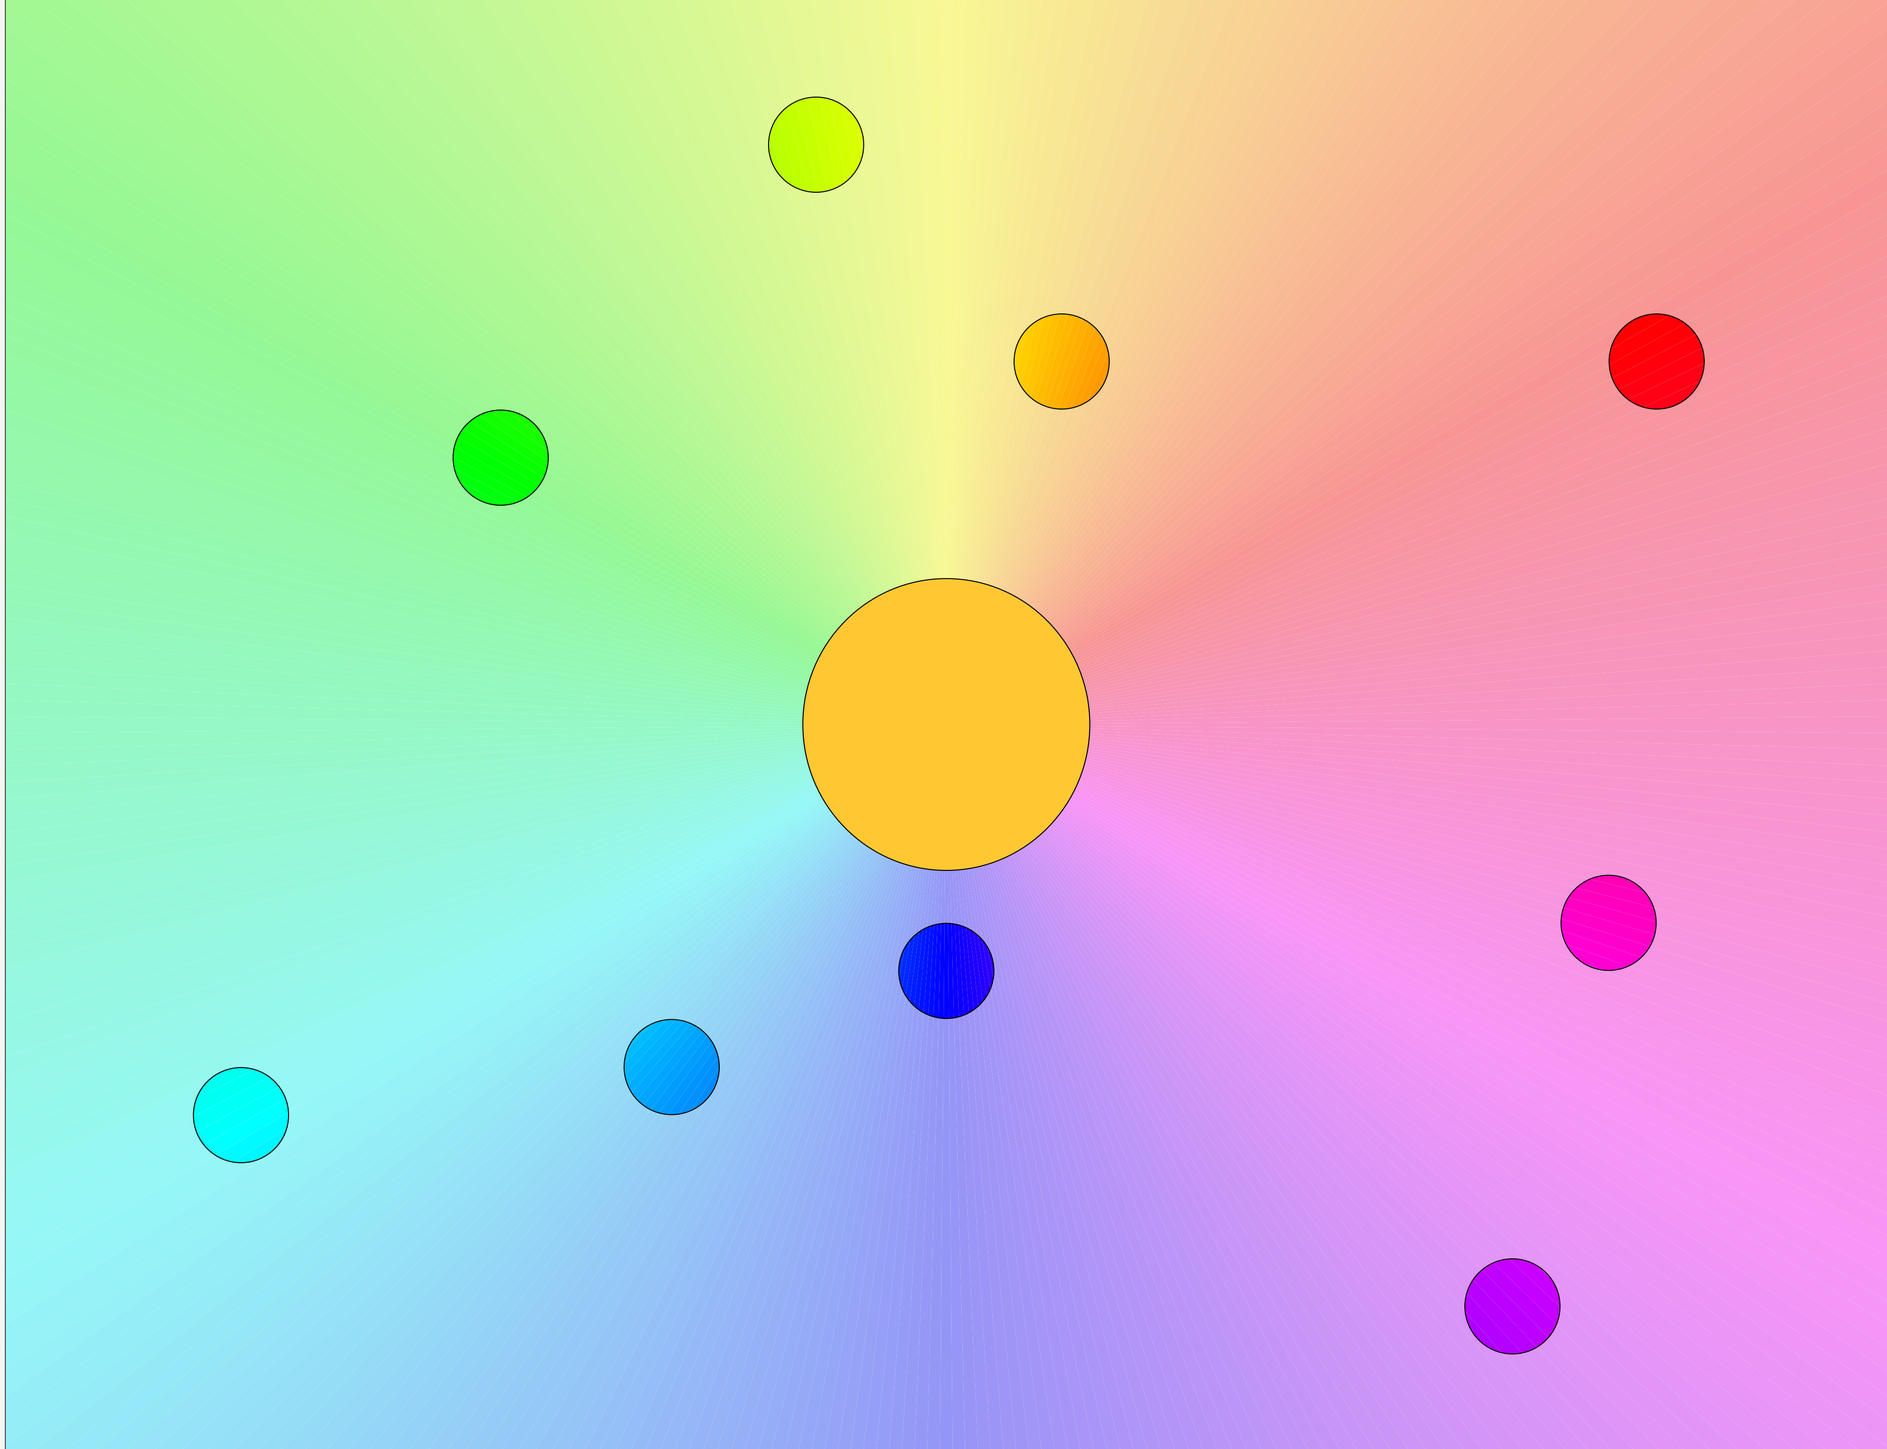

3

Colors
Extended

Sound exists in every color. When TRO works with a client, the color palette adapts. Any color can become part of our world – because the brand is built to embrace the identity of those it works with.

The client's own color code is used in combination with TRO Yellow, creating a unique but consistent visual language for each project. TRO Yellow always remains the connecting element – the one constant that carries the brand across every collaboration.

4

Typography

4

Typography
Primary

Poppins is the primary typeface of the TRO brand. It is a geometric sans-serif with clean, rounded forms that feel modern and approachable. Three weights are used across the identity – Extralight, Light, and Medium – giving enough range for hierarchy and emphasis while keeping the overall tone consistent and refined.

Poppins is available for free download on **Google Fonts.**

Medium

4

Typography Hierachy

The typographic hierarchy is built from a small set of clearly defined styles. Large headlines use Poppins Extralight with a generous line height, giving them an open and elegant character.

Key words within headlines can be set in Poppins Light as a highlight, adding subtle weight contrast without breaking the flow. Smaller headlines, labels, body text, and lists each follow their own defined size, weight, and spacing rules – ensuring clarity and consistency across all applications.

5

Spheres

5

Spheres Concept

The sphere is the visual expression of TRO's sonic world. Soft, luminous, and alive with color – it makes sound visible. A form without edges, without limits, that expands and fills the space around it.

It represents the energy and emotion that sound creates – rendered visible as a soft, glowing form. Rich gradients and blurred edges give it depth and movement, as if the color itself is vibrating.

It is not a static shape. It is a world, expanding from its center.

5

Spheres
Colors

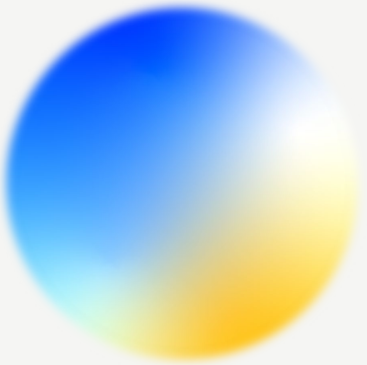

The sphere exists in many colors. Each combination reflects a different mood, a different energy – from warm and intense to cool and expansive.

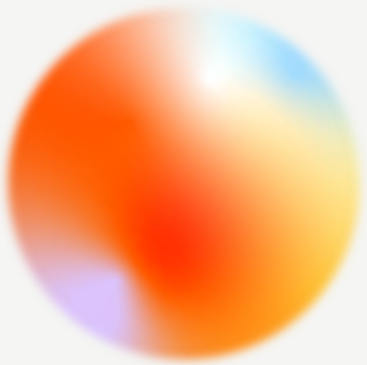

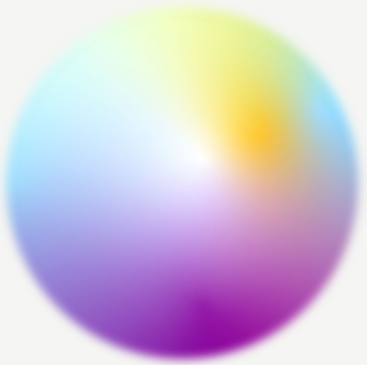

Like the TRO color palette, the sphere also adapts to the color codes of each client, creating a unique visual world for every collaboration.

TRO Yellow appears as a constant presence – the connecting thread across every world. This flexibility allows the sphere to work across campaigns and contexts, while always maintaining its organic, luminous character.

To create and adjust color variations, an Adobe Illustrator file is provided.

5

Spheres
Texture / Blur

The sphere can take on different levels of texture and blur. A fine inner structure adds depth and a sense of vibration. A softer, more diffused form feels atmospheric and immersive. Both variations are approved for use and can be applied depending on the context and desired effect.

To adjust the texture and blur, an Adobe Photoshop file is provided.

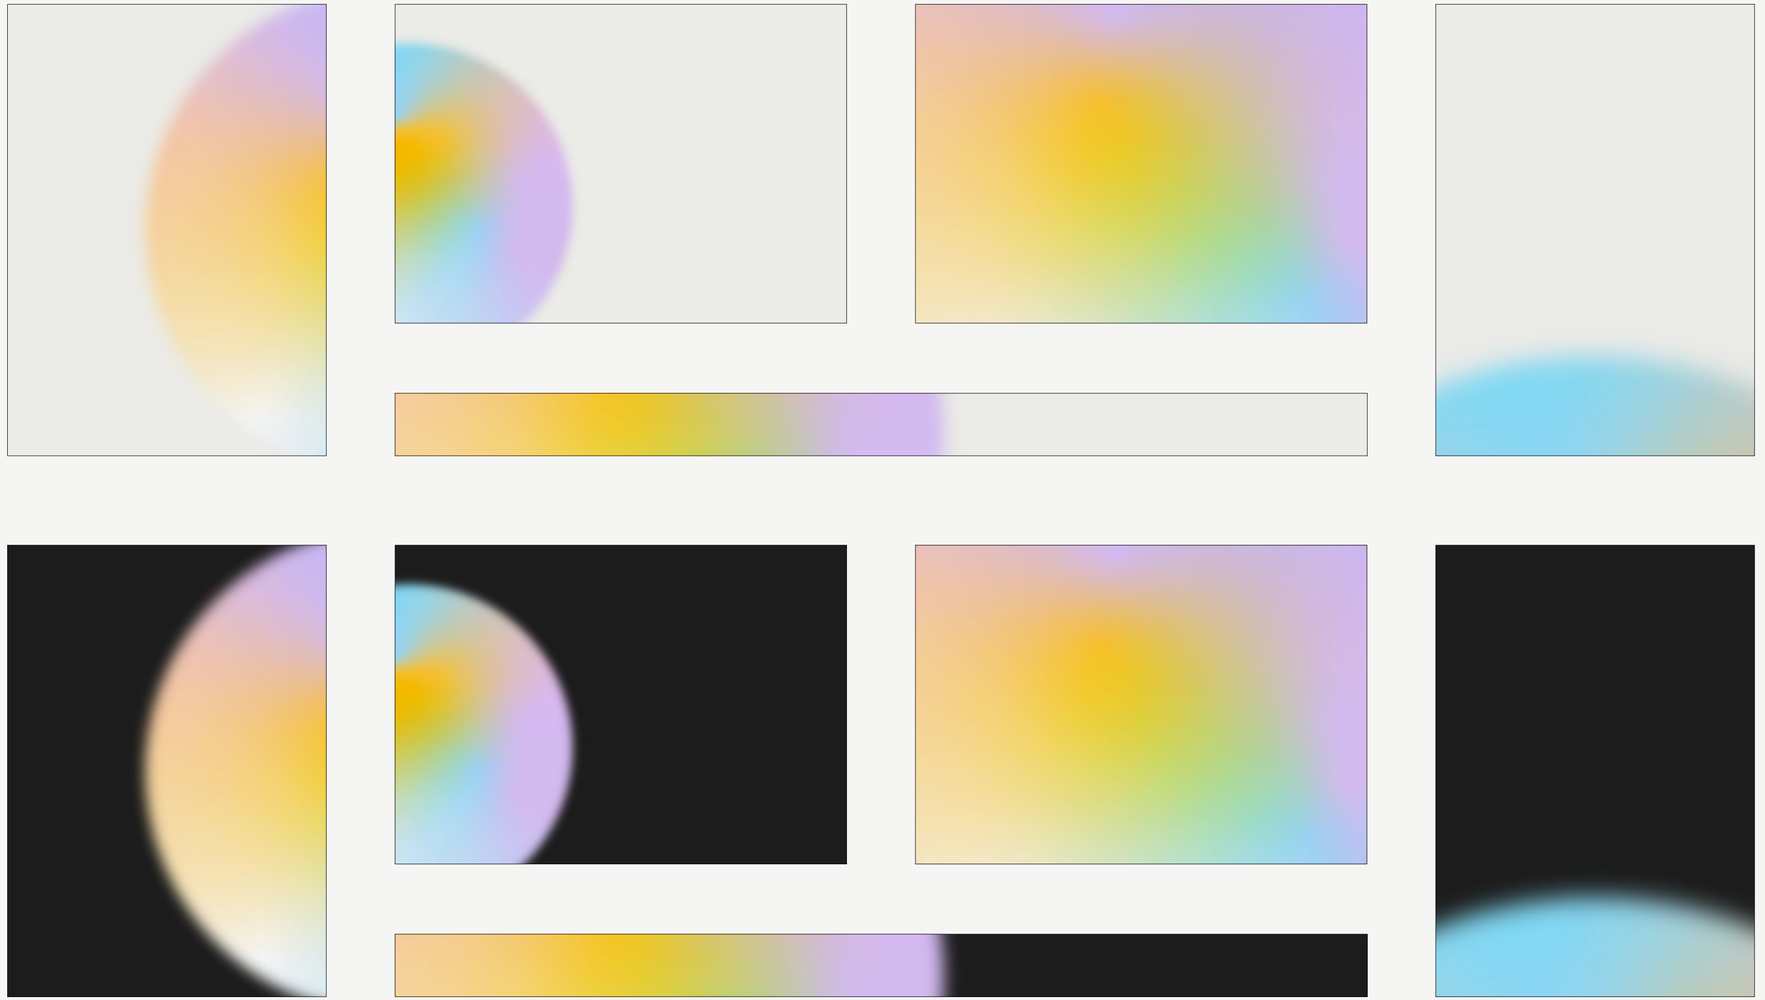

5

Spheres
Position

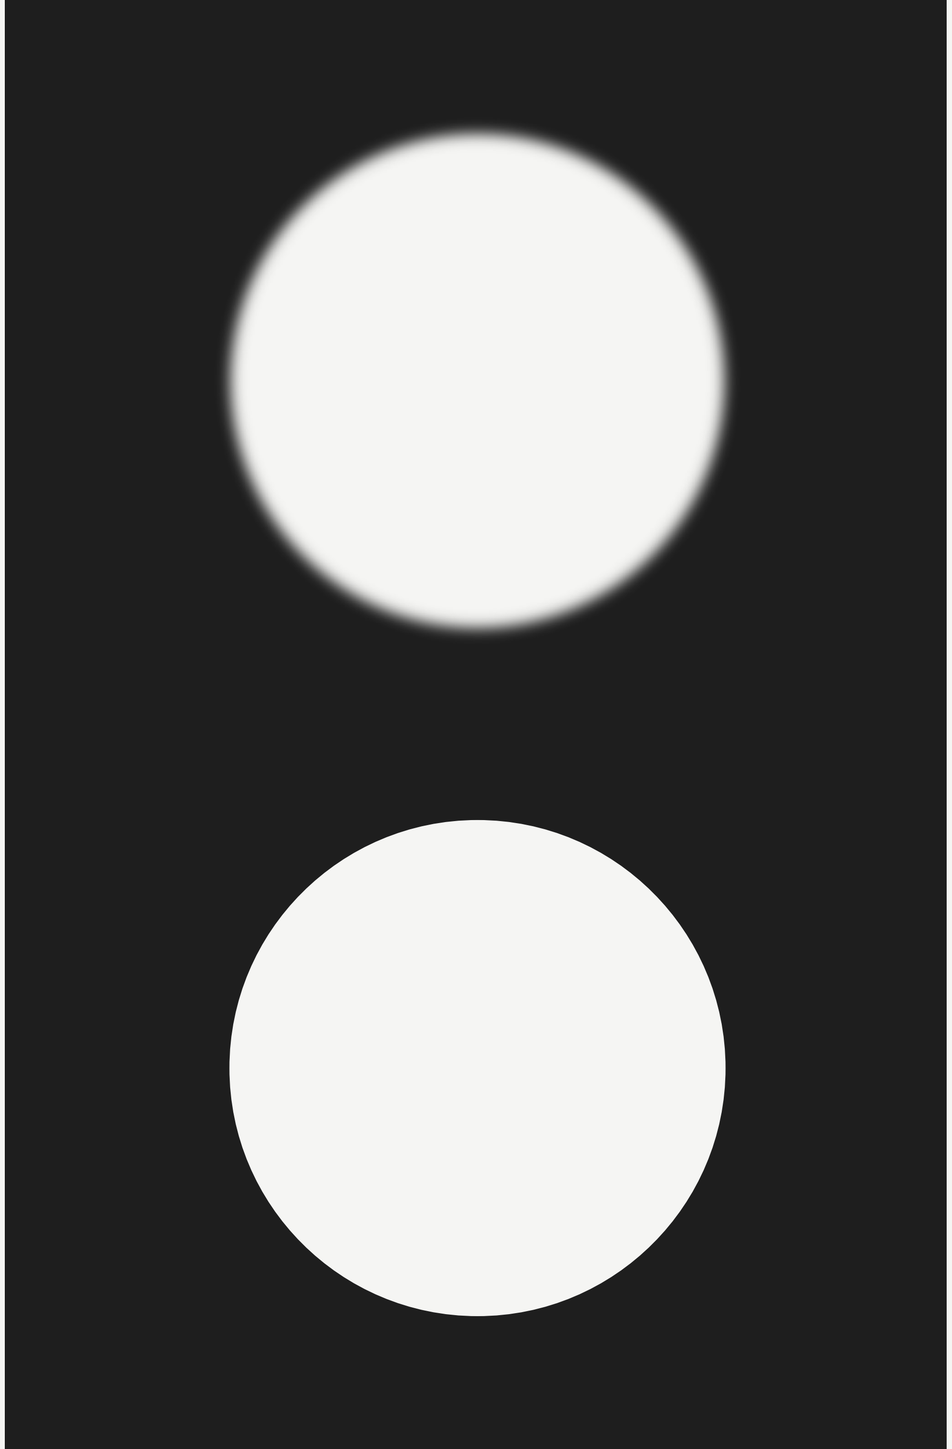

The sphere is designed to move freely within any layout. It can be centered, cropped, or pushed to the edge of a format – on both light and dark backgrounds. This flexibility allows it to create tension, depth and visual rhythm across all applications.

5

Sphere
Monochrome

In addition to its full-color form, the sphere is also available in monochrome. White on dark and black on light – reduced to its purest shape. With or without blur, the monochrome sphere retains its presence and softness, offering a quieter version of the visual language.

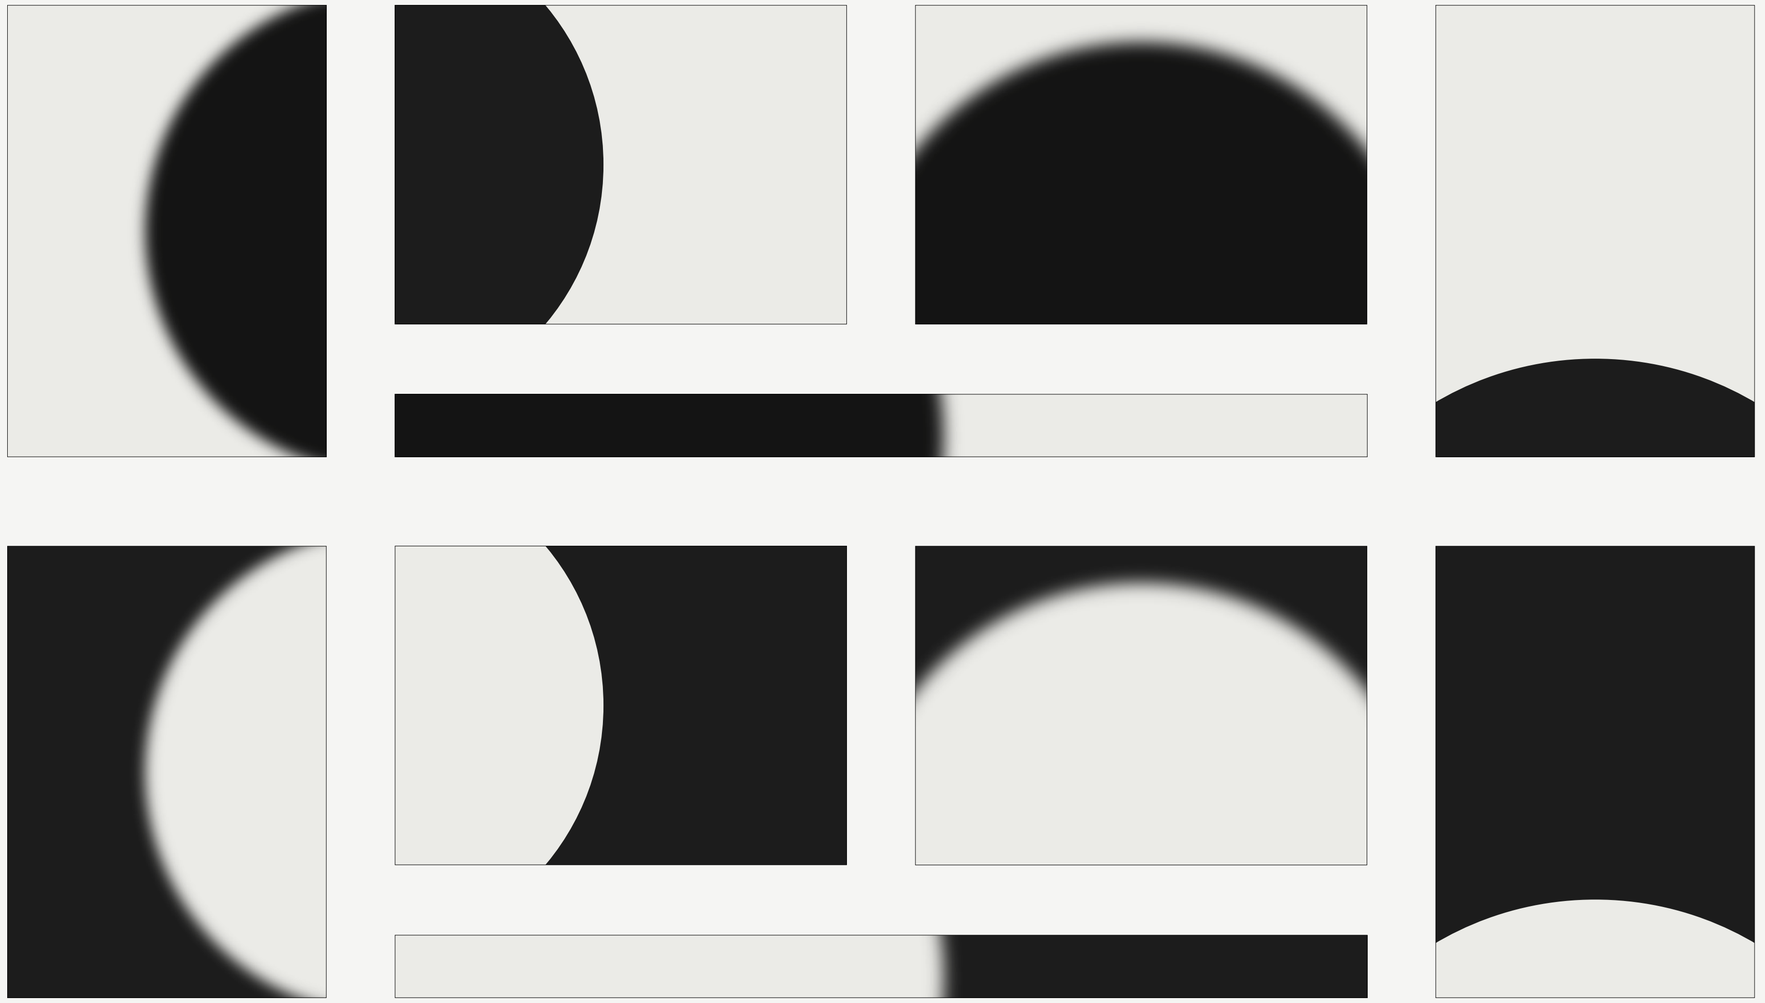

5

Spheres
Position

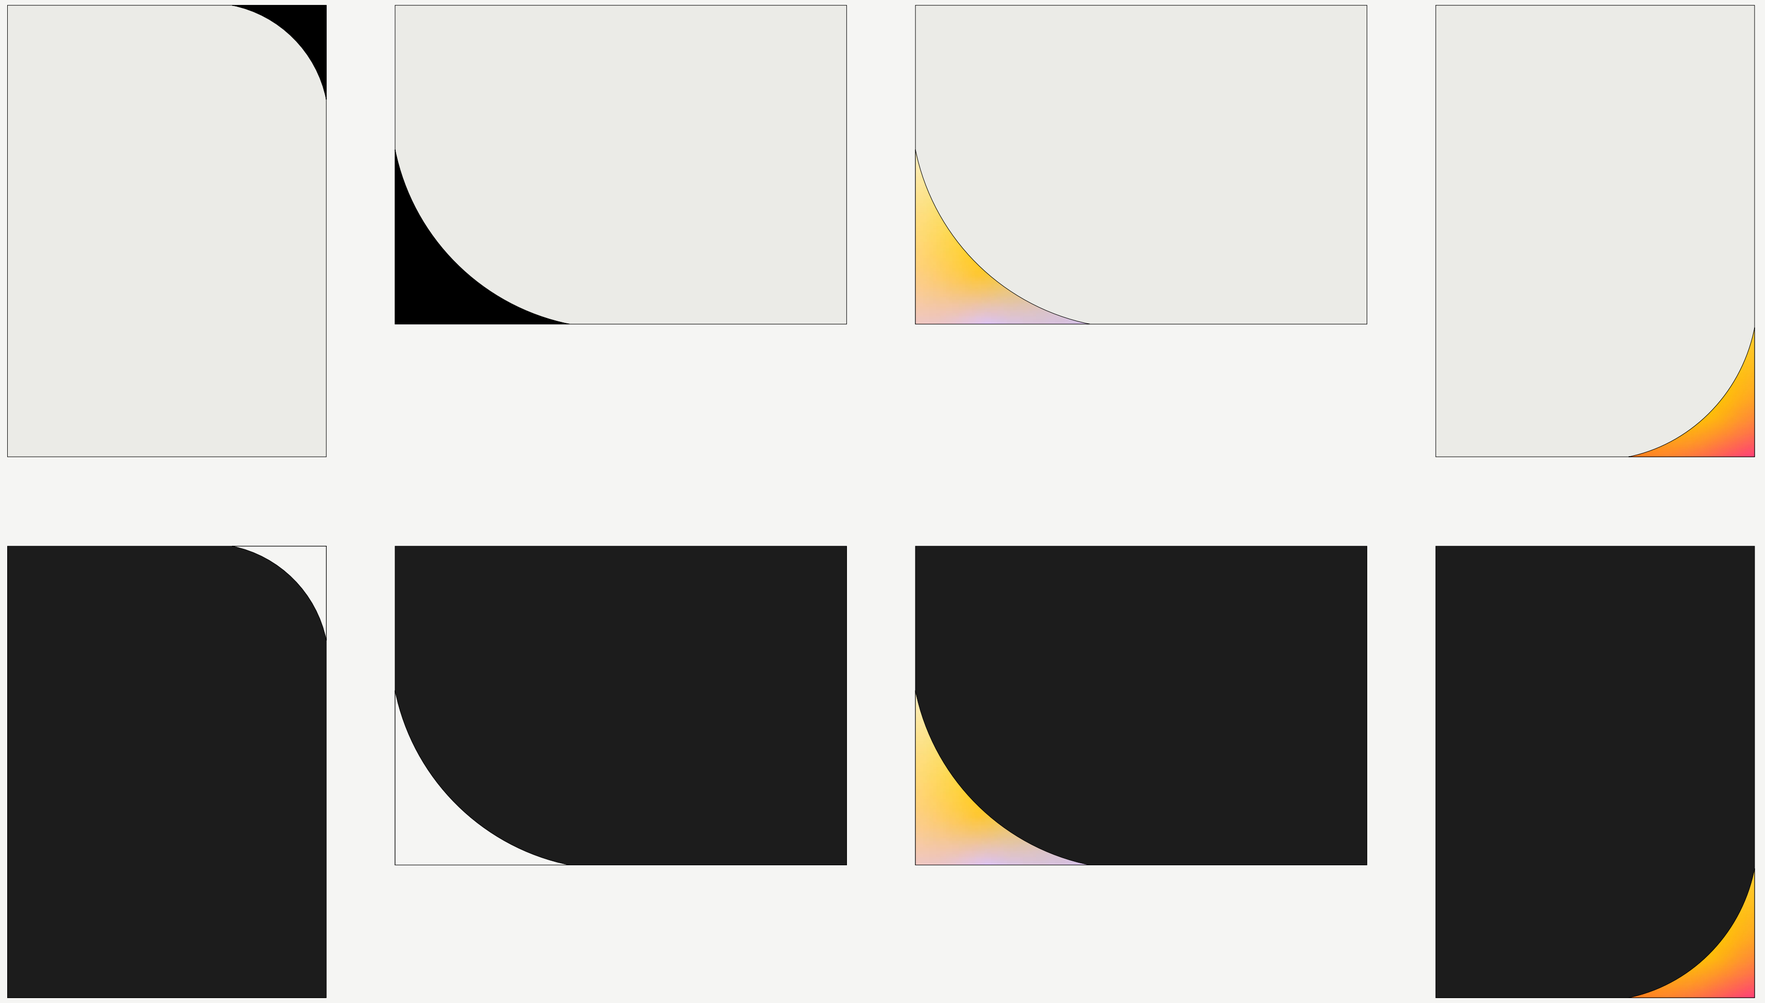

The same positioning rules apply to the mono-chrome spheres. Centered or cropped, floating or anchored to a corner – it adapts to any format and any context. The contrast between the soft, blurred form and the sharp edge of the layout creates a natural visual tension that draws the eye in.

5

Spheres
Corners

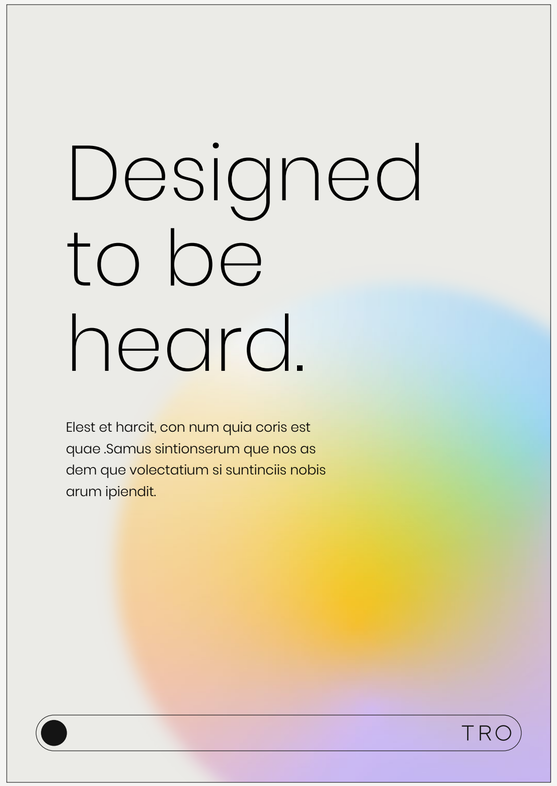

The sphere can be cropped to show only its curved edge, placed in the corner of a layout. Reduced to a single arc, it frames the composition without dominating it. Available in Monochrome and color, on light and dark backgrounds.

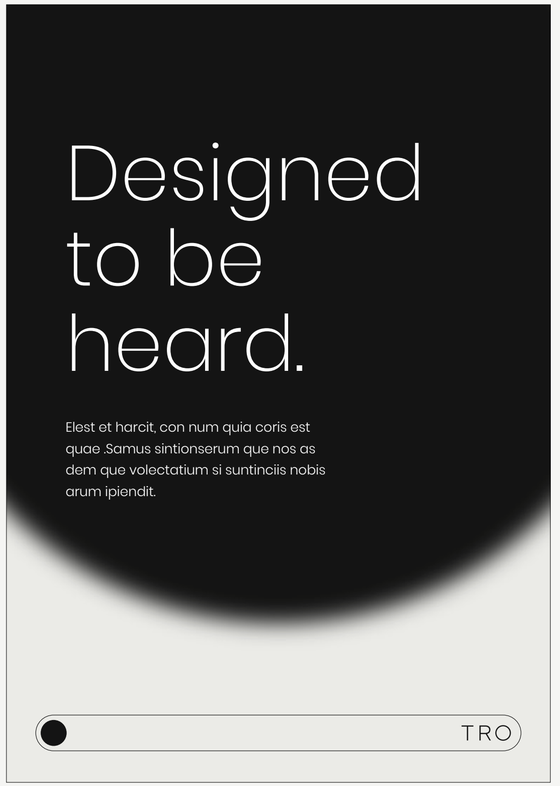

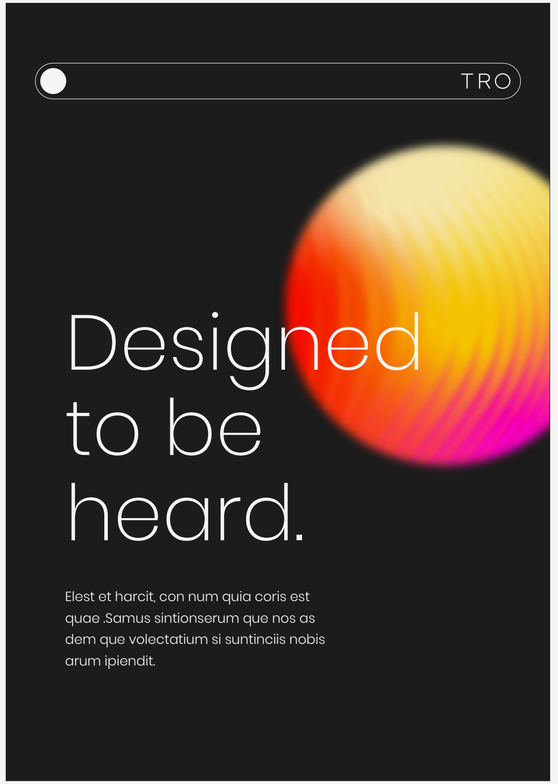

5

Spheres
Examples

These examples show the sphere in use within a real layout. The sphere sits behind the content – creating atmosphere and depth without competing with the text. The logo runs along the bottom in its extended form, spanning the full width of the format. Together, sphere and logo form a coherent visual world that is immediately recognizable as TRO.

Spheres
Examples

6

Infographics

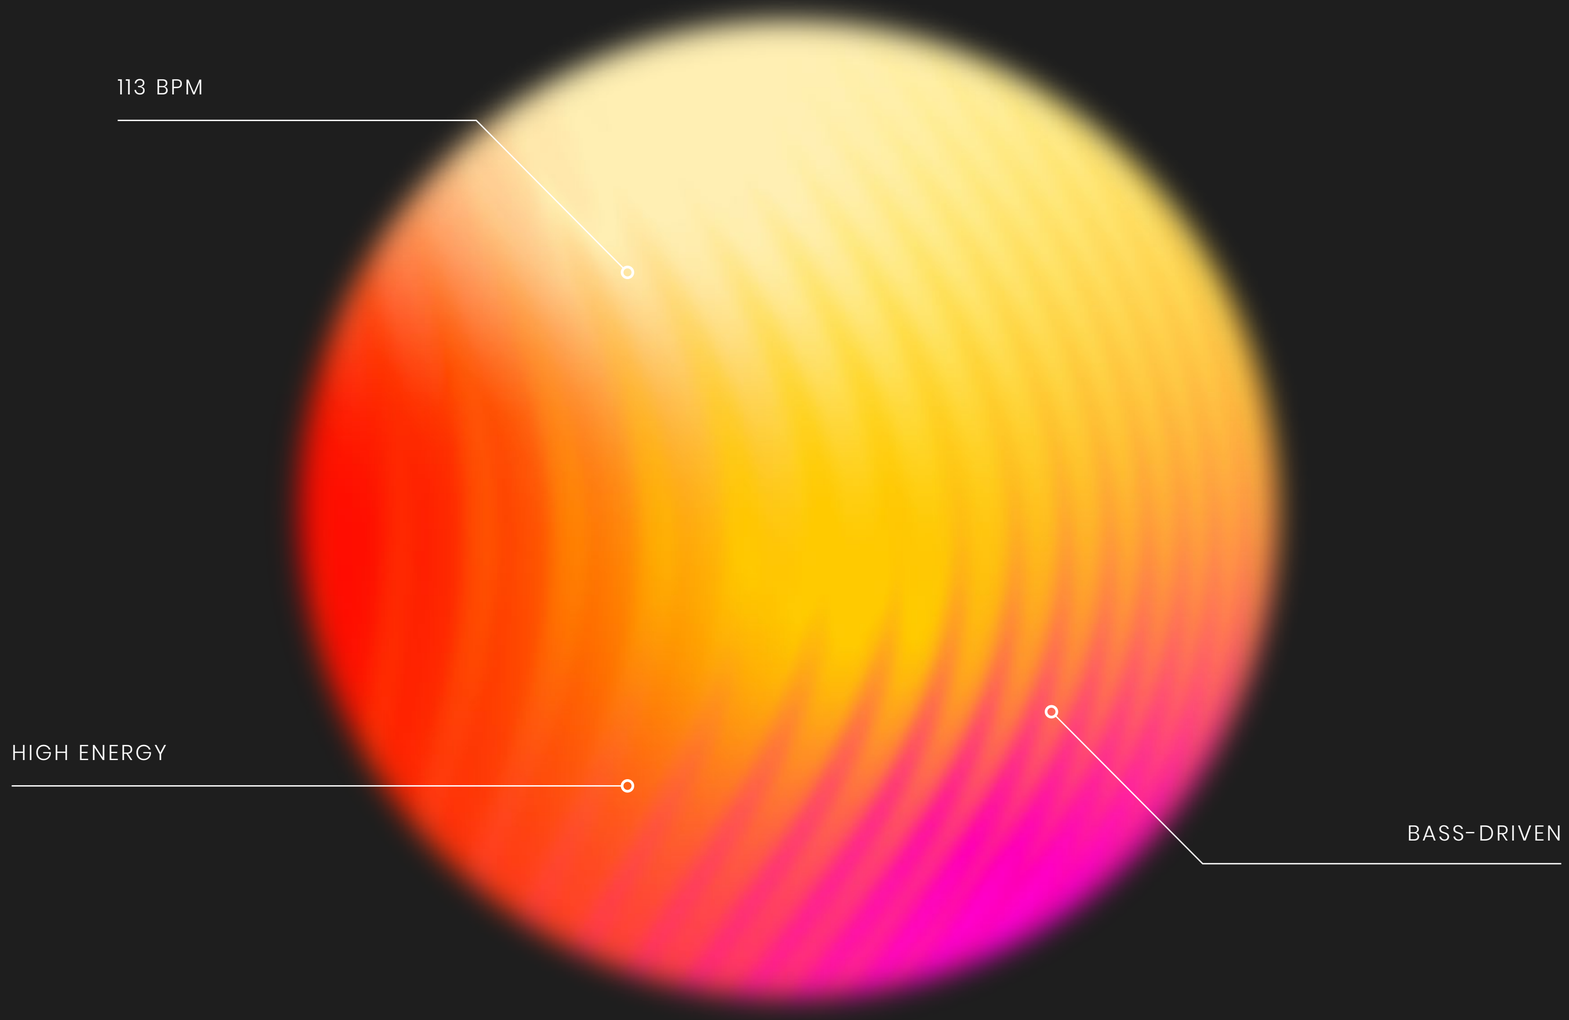

6

Infographics System

The TRO infographic system translates data and information into a visual language that feels native to the brand. Soft gradients and spheres form the expressive base – combined with thin, precise lines and technical annotations.

This contrast between the organic and the technical is intentional. It gives the infographics both warmth and clarity, making complex information readable without losing the visual character of the brand.

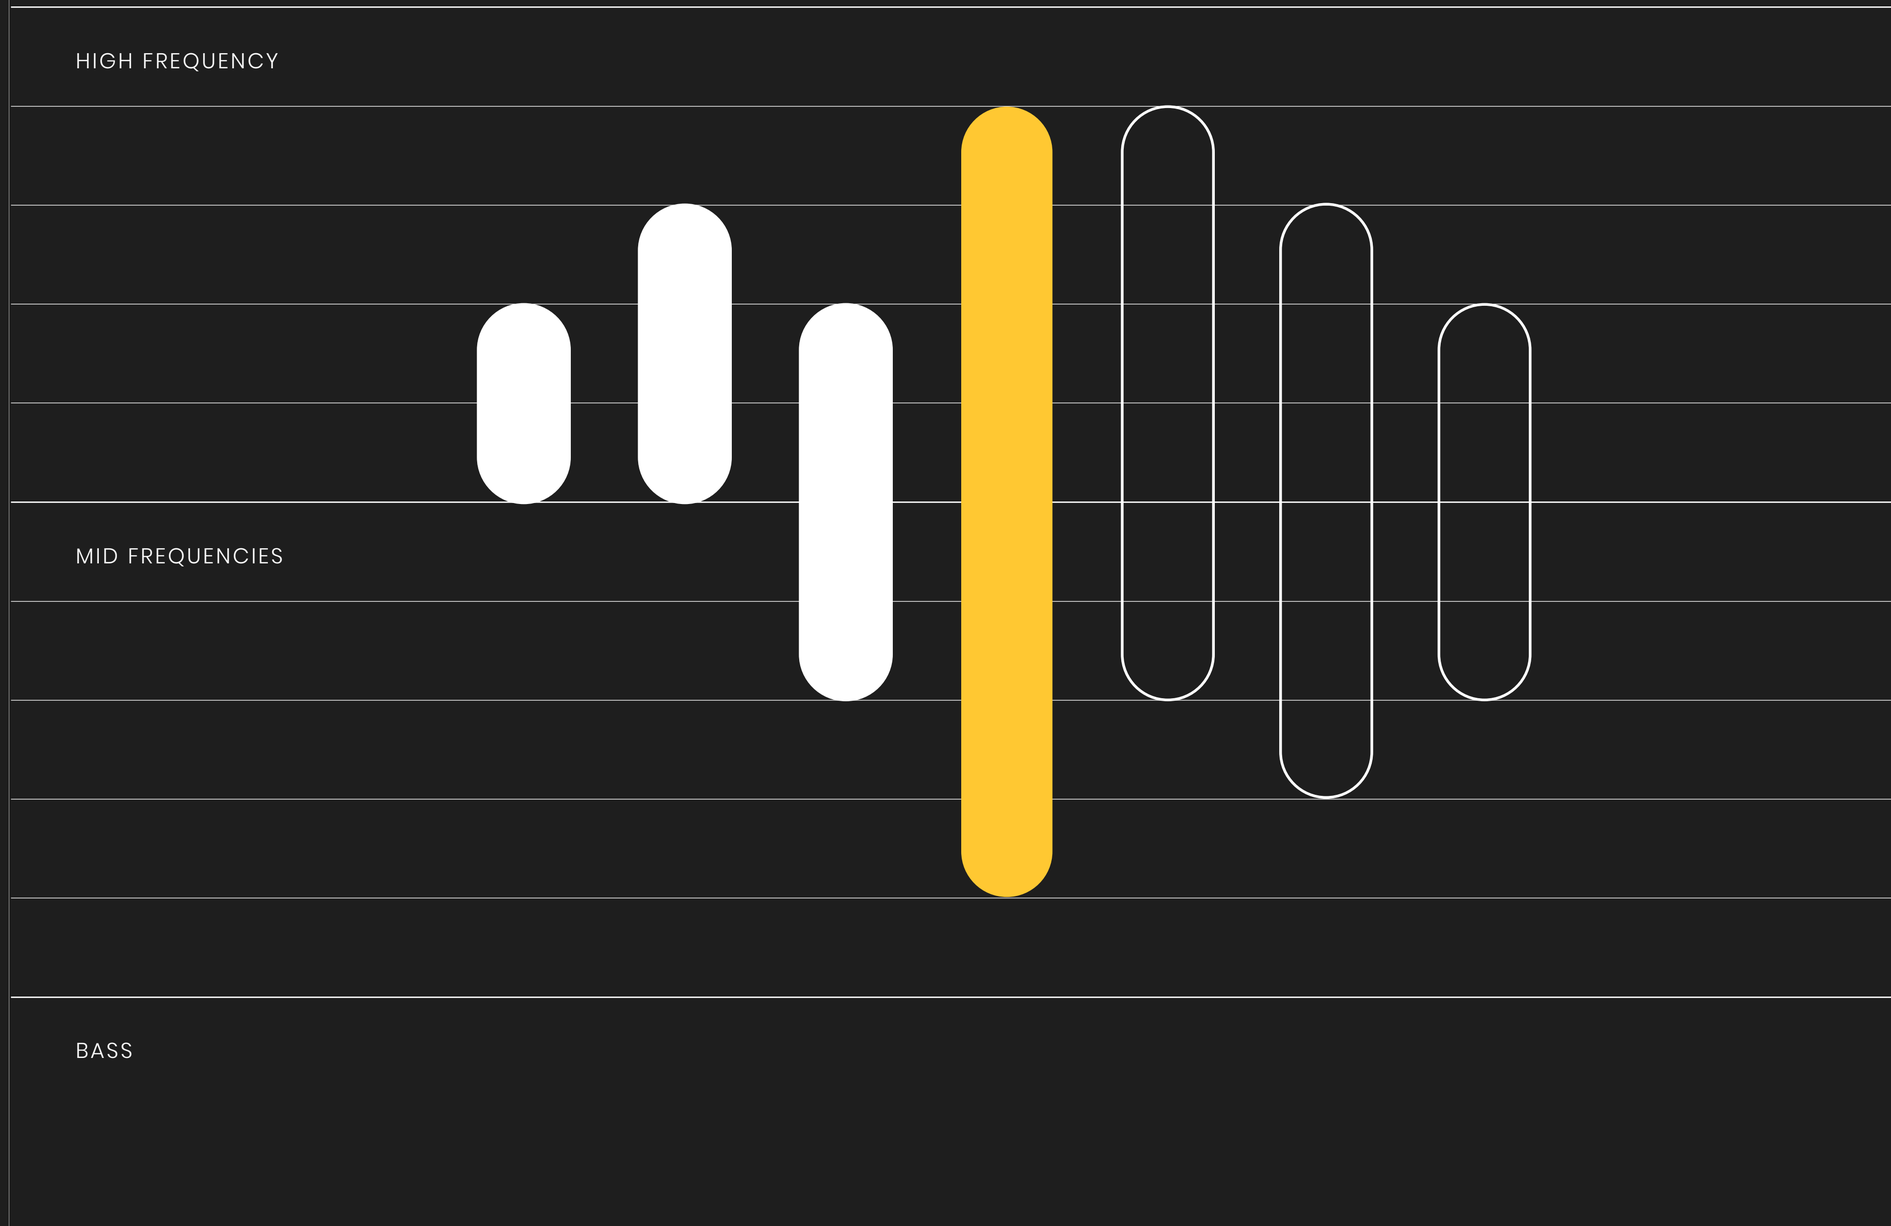

The system covers a range of formats – from bar and pie charts to sphere annotations and Venn diagrams – all built on the same consistent visual logic.

6

Infographics
Bar Chart

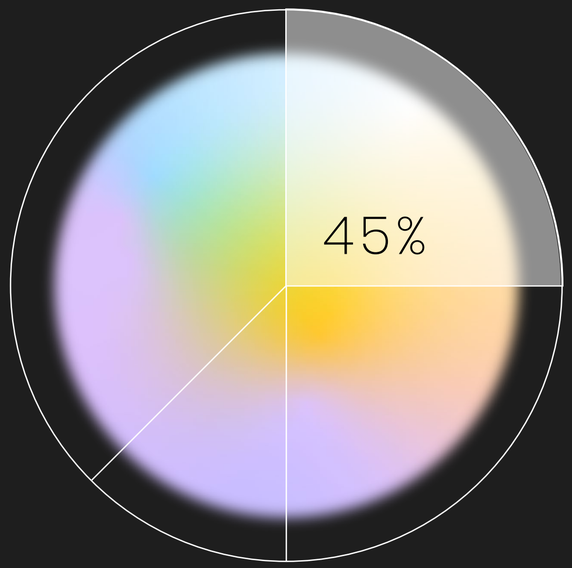

The bar chart uses rounded forms and thin grid lines to present data in a way that feels precise yet visual. TRO Yellow highlights key values. The content shown here is an example – the format can be adapted to any data set.

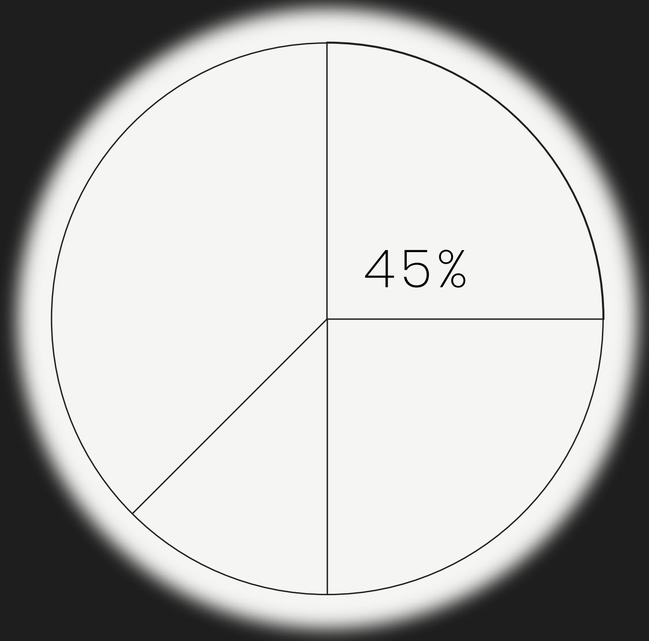

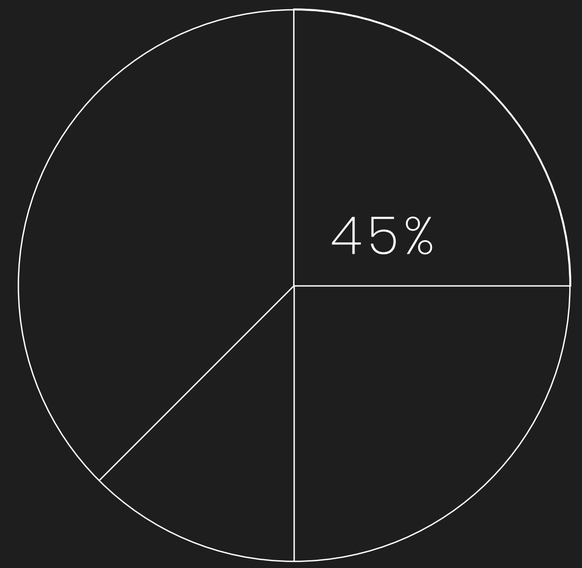

6

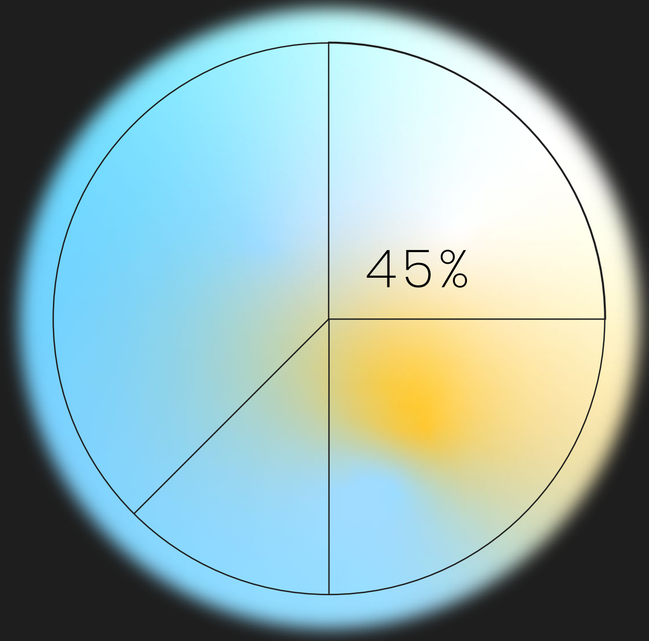

Infographics
Pie Chart

The pie chart is available in various style variations – with sphere, monochrome, light, and color. This gives flexibility to match any background or context, while keeping a consistent visual structure.

6

Infographics Flexibility

The sphere and thin lines can be combined in many ways to visualize data and relationships. The Venn diagram shown here is just one example. The system is open and flexible – inviting creative approaches that stay true to the visual language of the brand while adapting to any kind of information or content.

7

Imagery

7

Imagery
Style

The imagery is black and white. This is a deliberate choice – creating a clear visual contrast to the vibrant energy of the sphere, and giving the color world its full strength when the two appear together.

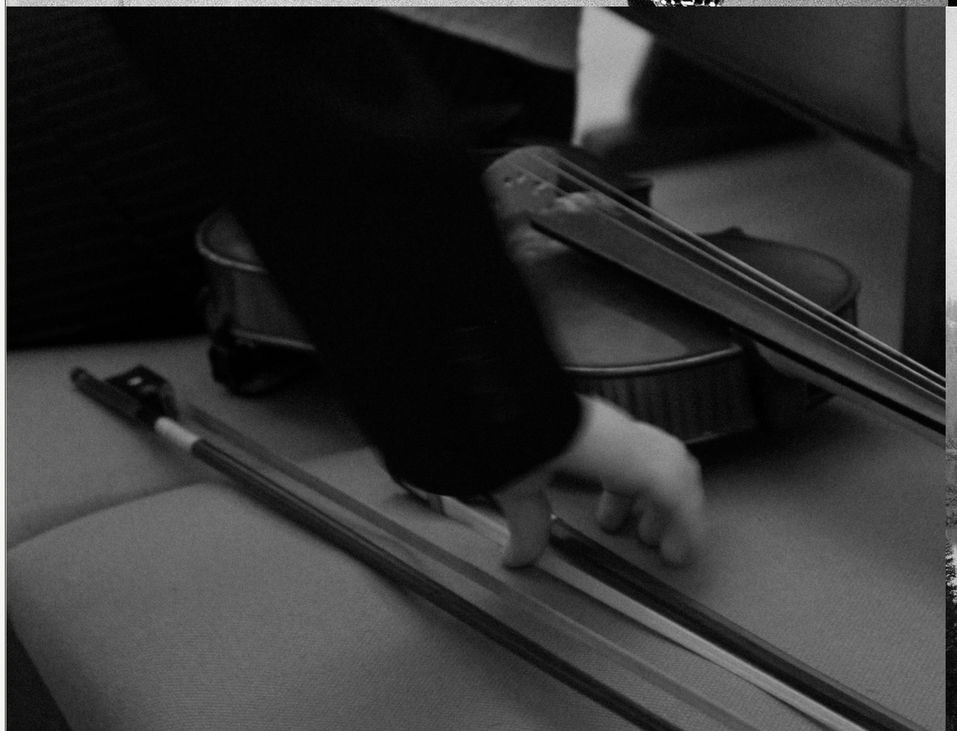

The photography style is real and unpretentious. Real people, unstaged moments, autobiographic details. The charm of the ordinary over the polished and constructed. An eye for the small stories that surround us – a gesture, a movement, a fleeting moment of everyday life.

This approach reflects a core belief of the TRO brand: that authenticity has more power than perfection.

Images can be sourced from **Unsplash** – a library of high-quality, freely available photography.

7

Imagery
Community

Our image world is not built by one hand alone. Team members are invited to contribute their own snapshots – authentic moments from everyday life, captured without staging or filter. Blur, unusual crops and imperfect framing are not mistakes. They are part of the style. The best images are often the ones that were never planned.

Work in progress (Bildmaterial Einwegkameras)

8

Icons

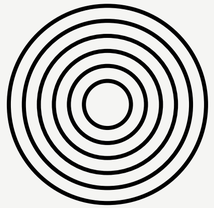

8

Icons
Style

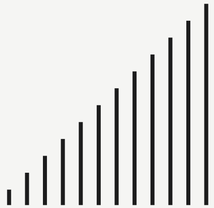

The icon set is drawn from the world of sound. Each icon is built from thin, precise lines – circular patterns, frequency curves, waveforms, and radiating shapes that reference the language of audio and music. The style is clean and consistent, using only outlines without fill.

Icons can be literal – directly referencing sound, music or voice – or more abstract, reflecting broader brand values such as orchestration, inspiration, or simplification. Both approaches follow the same linear style, keeping the set visually coherent across all applications.

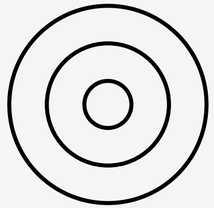

The set can be extended with icons from the **Phosphor icon library** in thin weight, which matches the line style of the TRO icons and allows the system to grow flexibly without losing consistency.

9

Social Media

9

Social Media
Instagram

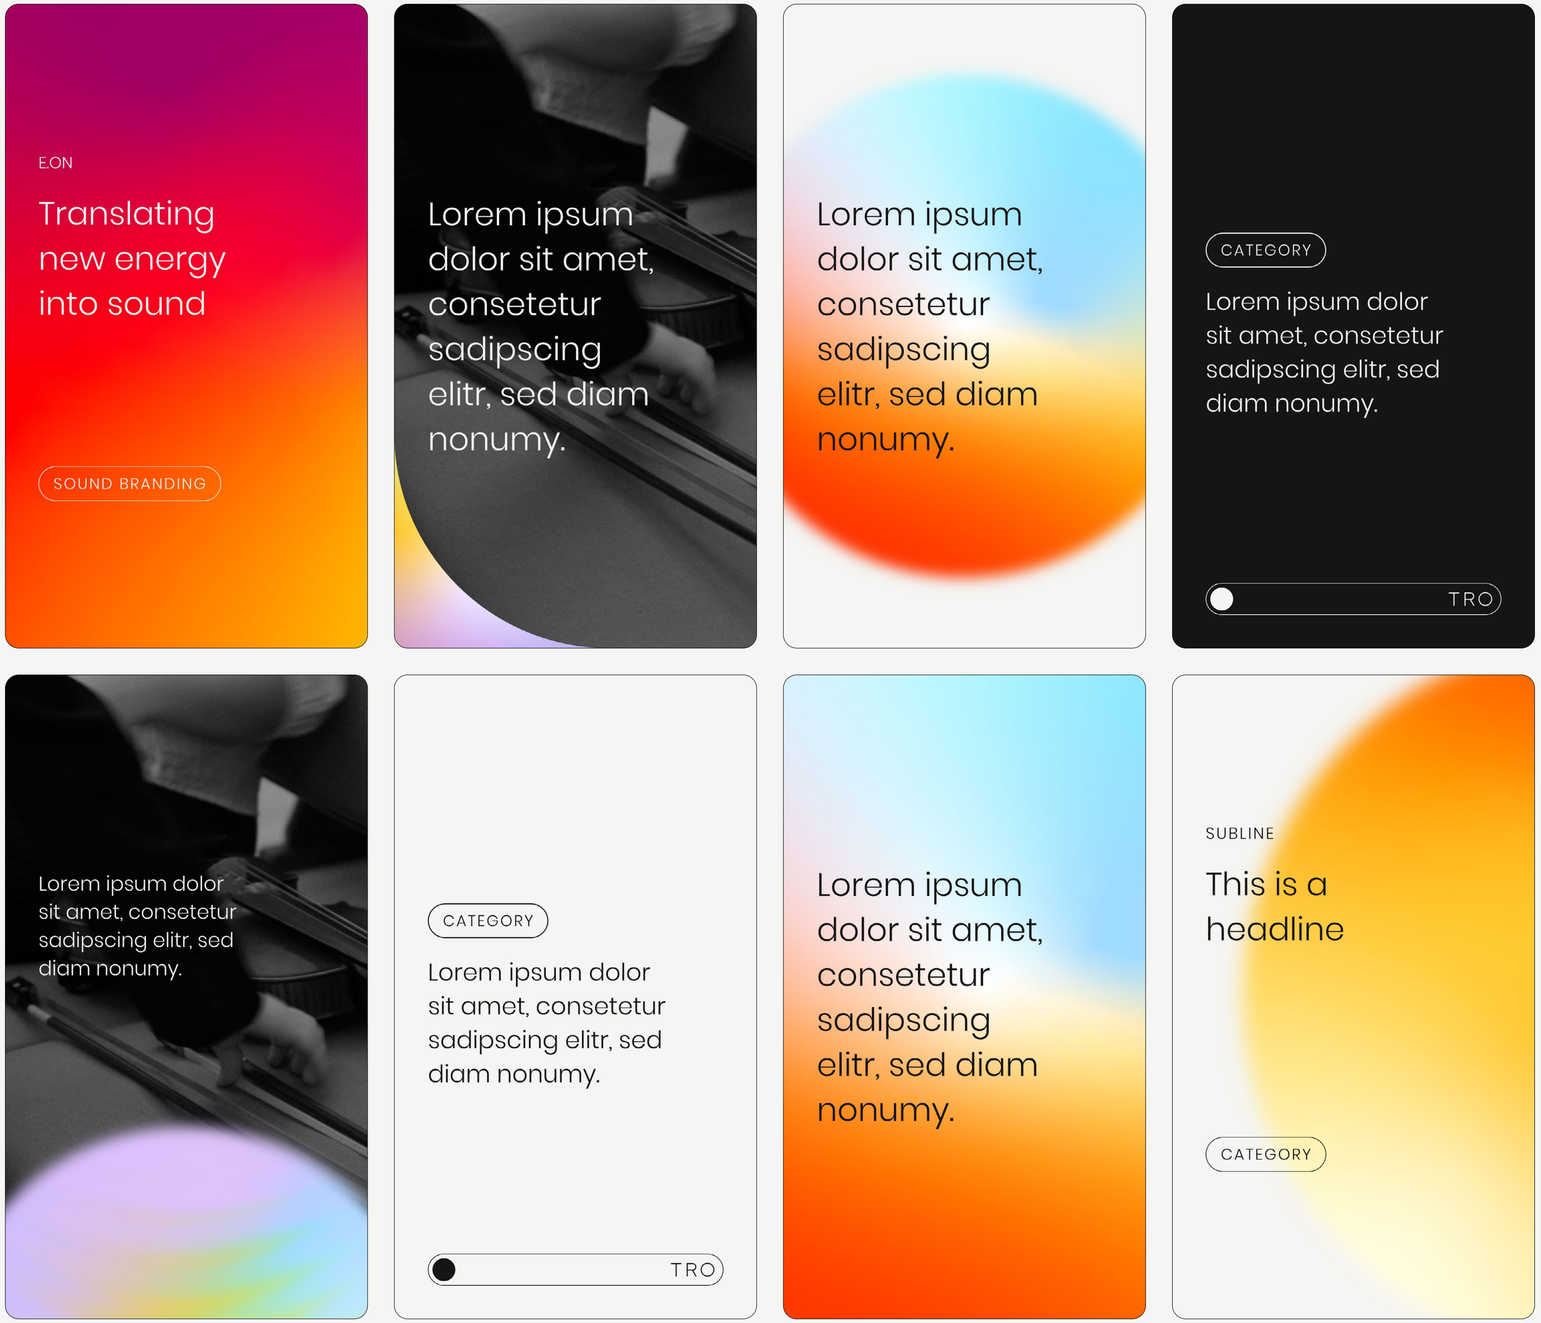

The Instagram feed brings the full visual identity to life. Spheres, black and white photography, color gradients, and the logo work together across a variety of post formats – creating a feed that feels both diverse and consistent. Selected posts feature rounded corners, giving the feed a distinctive and recognizable look. Category labels and team portraits give the feed a human and organized character.

9

Social Media
Instagram

The story and reel cover templates follow the same visual language as the feed – spheres, photography, color fields, and the logo in its extended form. The vertical format gives the sphere and color more room to breathe, creating an immersive and atmospheric feel. Category labels and the logo serve as consistent anchors, ensuring every story and reel cover is immediately recognizable as TRO.

These guidelines are the foundation for a consistent and distinctive brand presence. They are designed to give clarity and direction – and enough flexibility to let the brand come alive across every context.

For questions regarding the use of brand assets, please contact TRO directly.
